FIVE FREE TOOLS

For Writing, Formatting, and Publishing an eBook

BestSeller

I used these **five software applications** to build eBooks that repeatedly went to #1 on Amazon and did it **absolutely free**, including electronic editing, e-file conversion, and cover design. You, too, can write a **BestSeller** by using these easy-to-use, downloadable tools. And, they're **FREE**!

Microsoft Word is by far the best word processing software to use, as your manuscript needs to be in a Word.doc format first before being imported into Calibre for epub and mobi file conversion. To get your **Free Word** program for Windows or Mac - **Click Here**

Grammarly is a top-notch editing software that you use alongside Word. It's far more than a spellchecker. **Grammarly** corrects grammar, punctuation, composition, tenses, word selection, proofreads, and much, much more. To get your **Free Grammarly** app – **Click Here**

Microsoft Paint is an awesome tool that allows you total creativity in custom tailoring your cover design and then sizing it as an acceptable jpeg for uploading to Amazon. Simply build your image in a Word.doc, then screenshot it for easy editing in **MS Paint** – **Click Here**

Calibre is the #1 choice for converting files from a Word.doc (through html) and into an assortment of eBook files including Zip, Mobi, ePub, PDF, and many more. The learning curve is short and **Calibre**'s user-friendly app lets you easily edit your manuscript – **Click Here**

Amazon's Kindle Direct Publishing dashboard has a few quirks but, being the top dog in eBook publishing sales, it's a must-learn. Once your **Word.doc**-drafted, **Grammarly**-corrected, **Paint**-perfected, **Calibre**-converted manuscript is uploaded into **Amazon KDP**'s system, it's ready to become a **#1 BestSeller**. I did it repeatedly and so can you – **Click Here**
